Speed Dating Events in Croatia, Cyprus and Latvia in progress!

Croatia

At the end of January 2023, training programs in Croatia are slowly coming to an end for this cycle. At the beginning of February, the participants of the training will start preparing more actively for the final exams.

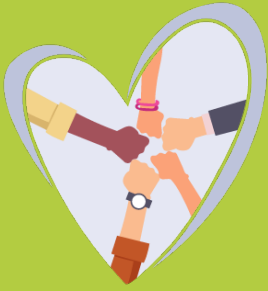

After the completion of the training program, a speed date event will be held within two weeks, where employers and job seekers will meet online.

In addition to the above, we are actively working on the

organization of a meeting of project partners that will take place on March 16 and 17, 2023 in Ogulin.

Cyprus

An overwhelming season has ended this January, with the completion of all local and international trainings, Digital Marketing, Business Administration/Office Administration & Bookkeeping in Cyprus. We would like to thank all participants, and Nautilus Youth

“...prepare your best public speaking skills and go ‘sell your personality!’...”

Center for hosting our training courses during the live and face to face trainings.

We are now preparing for the second wave of trainings which will take the form of one-to-one mentoring and individual support, by booking time with mentors and trainers for the trainings.

Instead of having 1 International Digital Marketing Course with 5 Modules we will divide each module into a separate course. This will give the opportunity to youth to select a specific module or more that they are interested in, and in which they can specialize. A Social Media Content Creator may not need to follow SEO Specialist modules, and vice-versa.

What's Next?

Speed Dating Events are in the oven, and Latvia, Croatia and Cyprus are inviting trained participants and companies to meet on online events and to local face to face events and create, share matching characteristics on specific job opportunities offered by participating companies.

Dear youth, prepare your best public speaking skills, and go ahead “sell yourself” in these match making events that will shape your future remote or hybrid work life”
