## THE GO REMOTE PROJECT HAS COME TO ITS END

### Croatia

After a very interesting and productive 2 and a half years, the Go remote project has come to an end. We can proudly say that we successfully completed all project activities. Through the activities, we spent a large number of young unemployed people from rural areas who we trained for remote jobs through training, provided them with mentors who guided them through the job search process, and we also gave them the opportunity to find a job

through the online Job speed date event.

As a young team of the Local development agency Pins, we have learned a lot through this project, and the experience and knowledge we have gained will certainly be useful in the implementation of future projects.

Remote work projects provide valuable insight into the importance of flexibility, technology, communication, work-life balance and adaptability in the modern workplace. Successfully

## The Partnership

**“... We are thrilled to announce the successful completion of our 30-month project, “Go Remote”...”**

navigating these aspects can lead to increased employee satisfaction, productivity, and a more resilient and inclusive work culture. For individuals in rural areas or locations with limited local employment opportunities, participating in telework projects expands their access to the global labor market.

The entire project team can be proud of the achieved project results!

## Latvia

January was an active month for the project team as the main activities included the final project activities in mentoring programme, live sessions on every monday, preparing the last reporting materials and, of course, preparing for the final event!

## The Final Event

The “Go Remote: Unlocking Youth Potential” project was concluded with a successful international event on January 16th at 11 CET. Hosted on Gather.town, the positive atmosphere was curated by avatars and host Vilhelms. Out of 110 invitees, 45 attendees participated online.

The agenda, though slightly delayed by 5-10 minutes, covered a range of topics from the presentation of project achievements to insights from various countries like Finland, Iceland, Latvia, Bulgaria, Cyprus, Croatia, and Norway.

Programme showcased the project’s impact and fostered valuable learnings, emphasizing the importance of mentoring for youth in and sharing best practices to reach specific demographics outlined in the project.

## Cyprus

We are thrilled to announce the successful completion of our 30-month project, “Go Remote,” aimed at assisting NEETs between the ages of 20 and 29 in their journey towards employment.

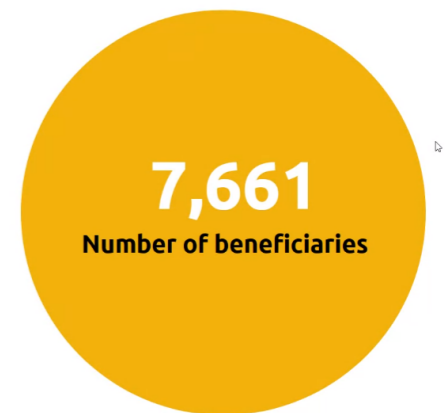

Throughout this initiative, we provided free courses to NEETs not only in Cyprus but also in the beneficiary countries of Bulgaria, Latvia, and Croatia, as well as

welcoming participants from other EU nations.

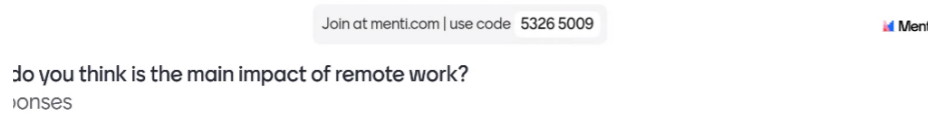

OTI has been unwavering in our commitment to offering mentorship and support to these individuals, resulting in hundreds of NEETs securing gainful employment in Cyprus.

Leveraging the strength of [Eurojobs.com](https://www.eurojobs.com), which we proudly own, and our extensive background in education, we have achieved outstanding outcomes for this project.

We extend our heartfelt gratitude to all the participants, partners, and supporters who made “Go Remote” a resounding success, transforming the lives of many and contributing to a brighter future for our communities.
